CLARAC

CONSULTANCY SERVICES

Clarac Consultancy Services aim to provide clients with tailored consultancy services based on their specific issues in the engineering and infrastructure industry.

Who We Are

Clarac Consultancy Services aim to provide clients with tailored consultancy services based on their specific issues in the engineering and infrastructure industry.

Utilising our extensive knowledge of the construction sector, we provide valuable input at all stages of the project, from design development to tender and construction phase.

We offer a unique expertise in the fields of program management, project management, project planning, risk analysis, contract management and procurement strategies.

What we do

Our team has an in-depth knowledge of the construction industry in the Middle East and all around the globe.

Program
Management

Project Management

Planning Management & Forensic Planning assistance

Risk Analysis

Procurement and Logistic strategies to projects

Advisory Works on contracts

- Advisory works on contracts
- Quantity Surveying solutions
- Contract management, variation orders preparation and follow-up
- Extension of Time preparation, advise and follow-up
- Claims preparation, advise and follow-up

Our team has an in-depth knowledge of the construction industry in the Middle East and all around the globe.

We can mobilize the appropriate expertise and form the proper alliances to meet specific requirements and respond to particular project demands.

We consistently favor appropriate smart contract management in order to avoid litigation and be able to amicably resolve any dispute.

Alexandre Ambrosini

Founder and Managing Director

Graduated from the French civil engineering school ESTP in 1996, Alexandre Ambrosini has spent over 25 years overseas in the Construction Industry working in South East Asia, in the Middle East and in Europe.

He has gained an in-depth knowledge of all the phases of the project cycle including strategic department and project planning, program management, project scope, project studies, organization, design management, budget set-up and cost follow-up, risk management, commercial negotiations and project execution.

Alexandre is fully familiar with all forms of contracts including FIDIC and many others, with a solid knowledge in claims preparations and dispute resolution mechanisms.

He has the ability to successfully adapt to new cultures and circumstances, and to manage groups of people, in high pressure environments with strict deadlines.

Adaptability

In such a multicultural working environment, with a multitude of projects governed by different construction contracts, we seek to understand our clients' commercial contexts and specific needs so that we can offer them the right support.

Professionalism

On each assignment, we are committed to providing our services efficiently and effectively. We engage our responsibility and our principles to consistently deliver to the highest standards possible.

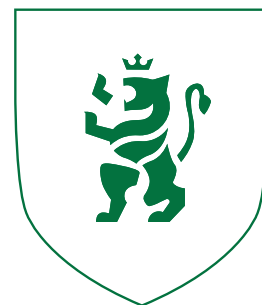

Excellence

Our principal goals are to provide the highest quality consultancy services and to be an instrumental part of our client's success. By listening to their precise needs and by analyzing each file in depth, we assist our clients to achieve the best results possible.
